

Standards Authoring

ExACT Standards Platform: Authoring Application

The ExACT Standards Platform (ExACT) is a collection of digital tools for managing, reporting and aligning content to standards. Clients use ExACT to define gaps in alignments, crosswalk standards, search the EdGate Standards Repository, and create custom reports.

Our Latest Addition: Authoring

Introduced at the request of several clients, Standards Authoring is the latest application available in ExACT. Standards Authoring not only provides importing capabilities for existing standards and frameworks, but also gives authors the ability to manage and edit them.

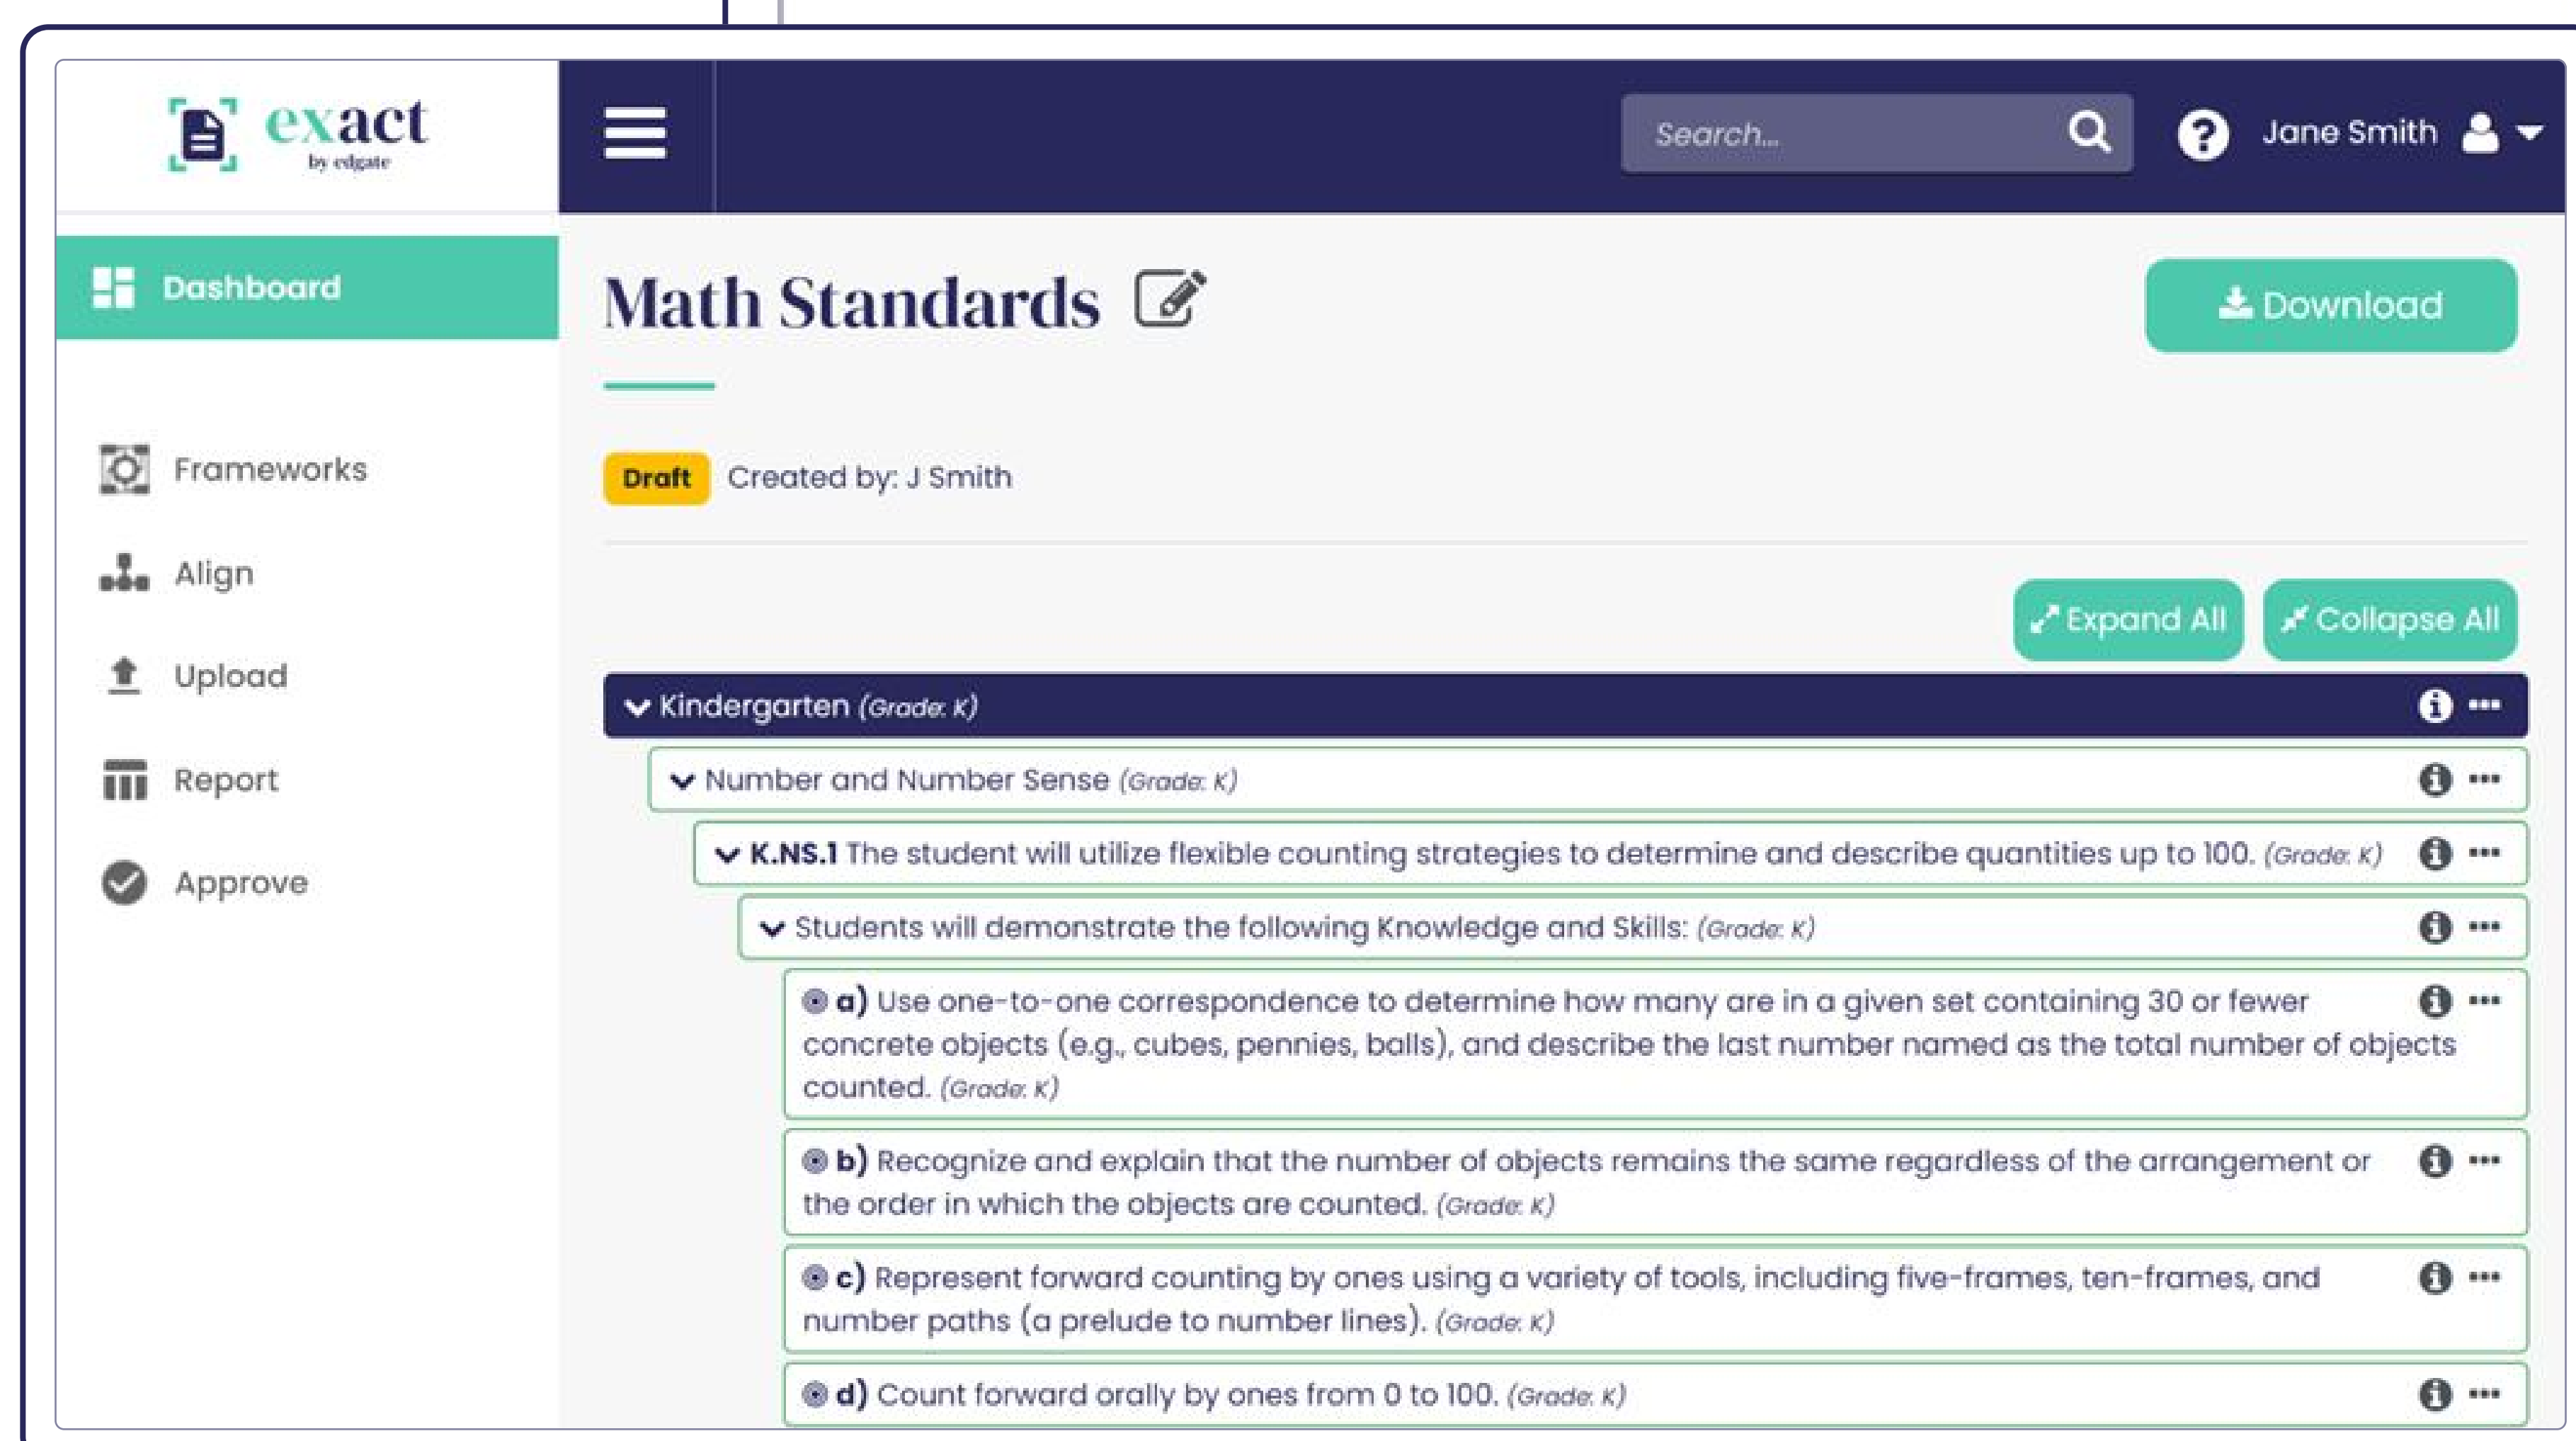

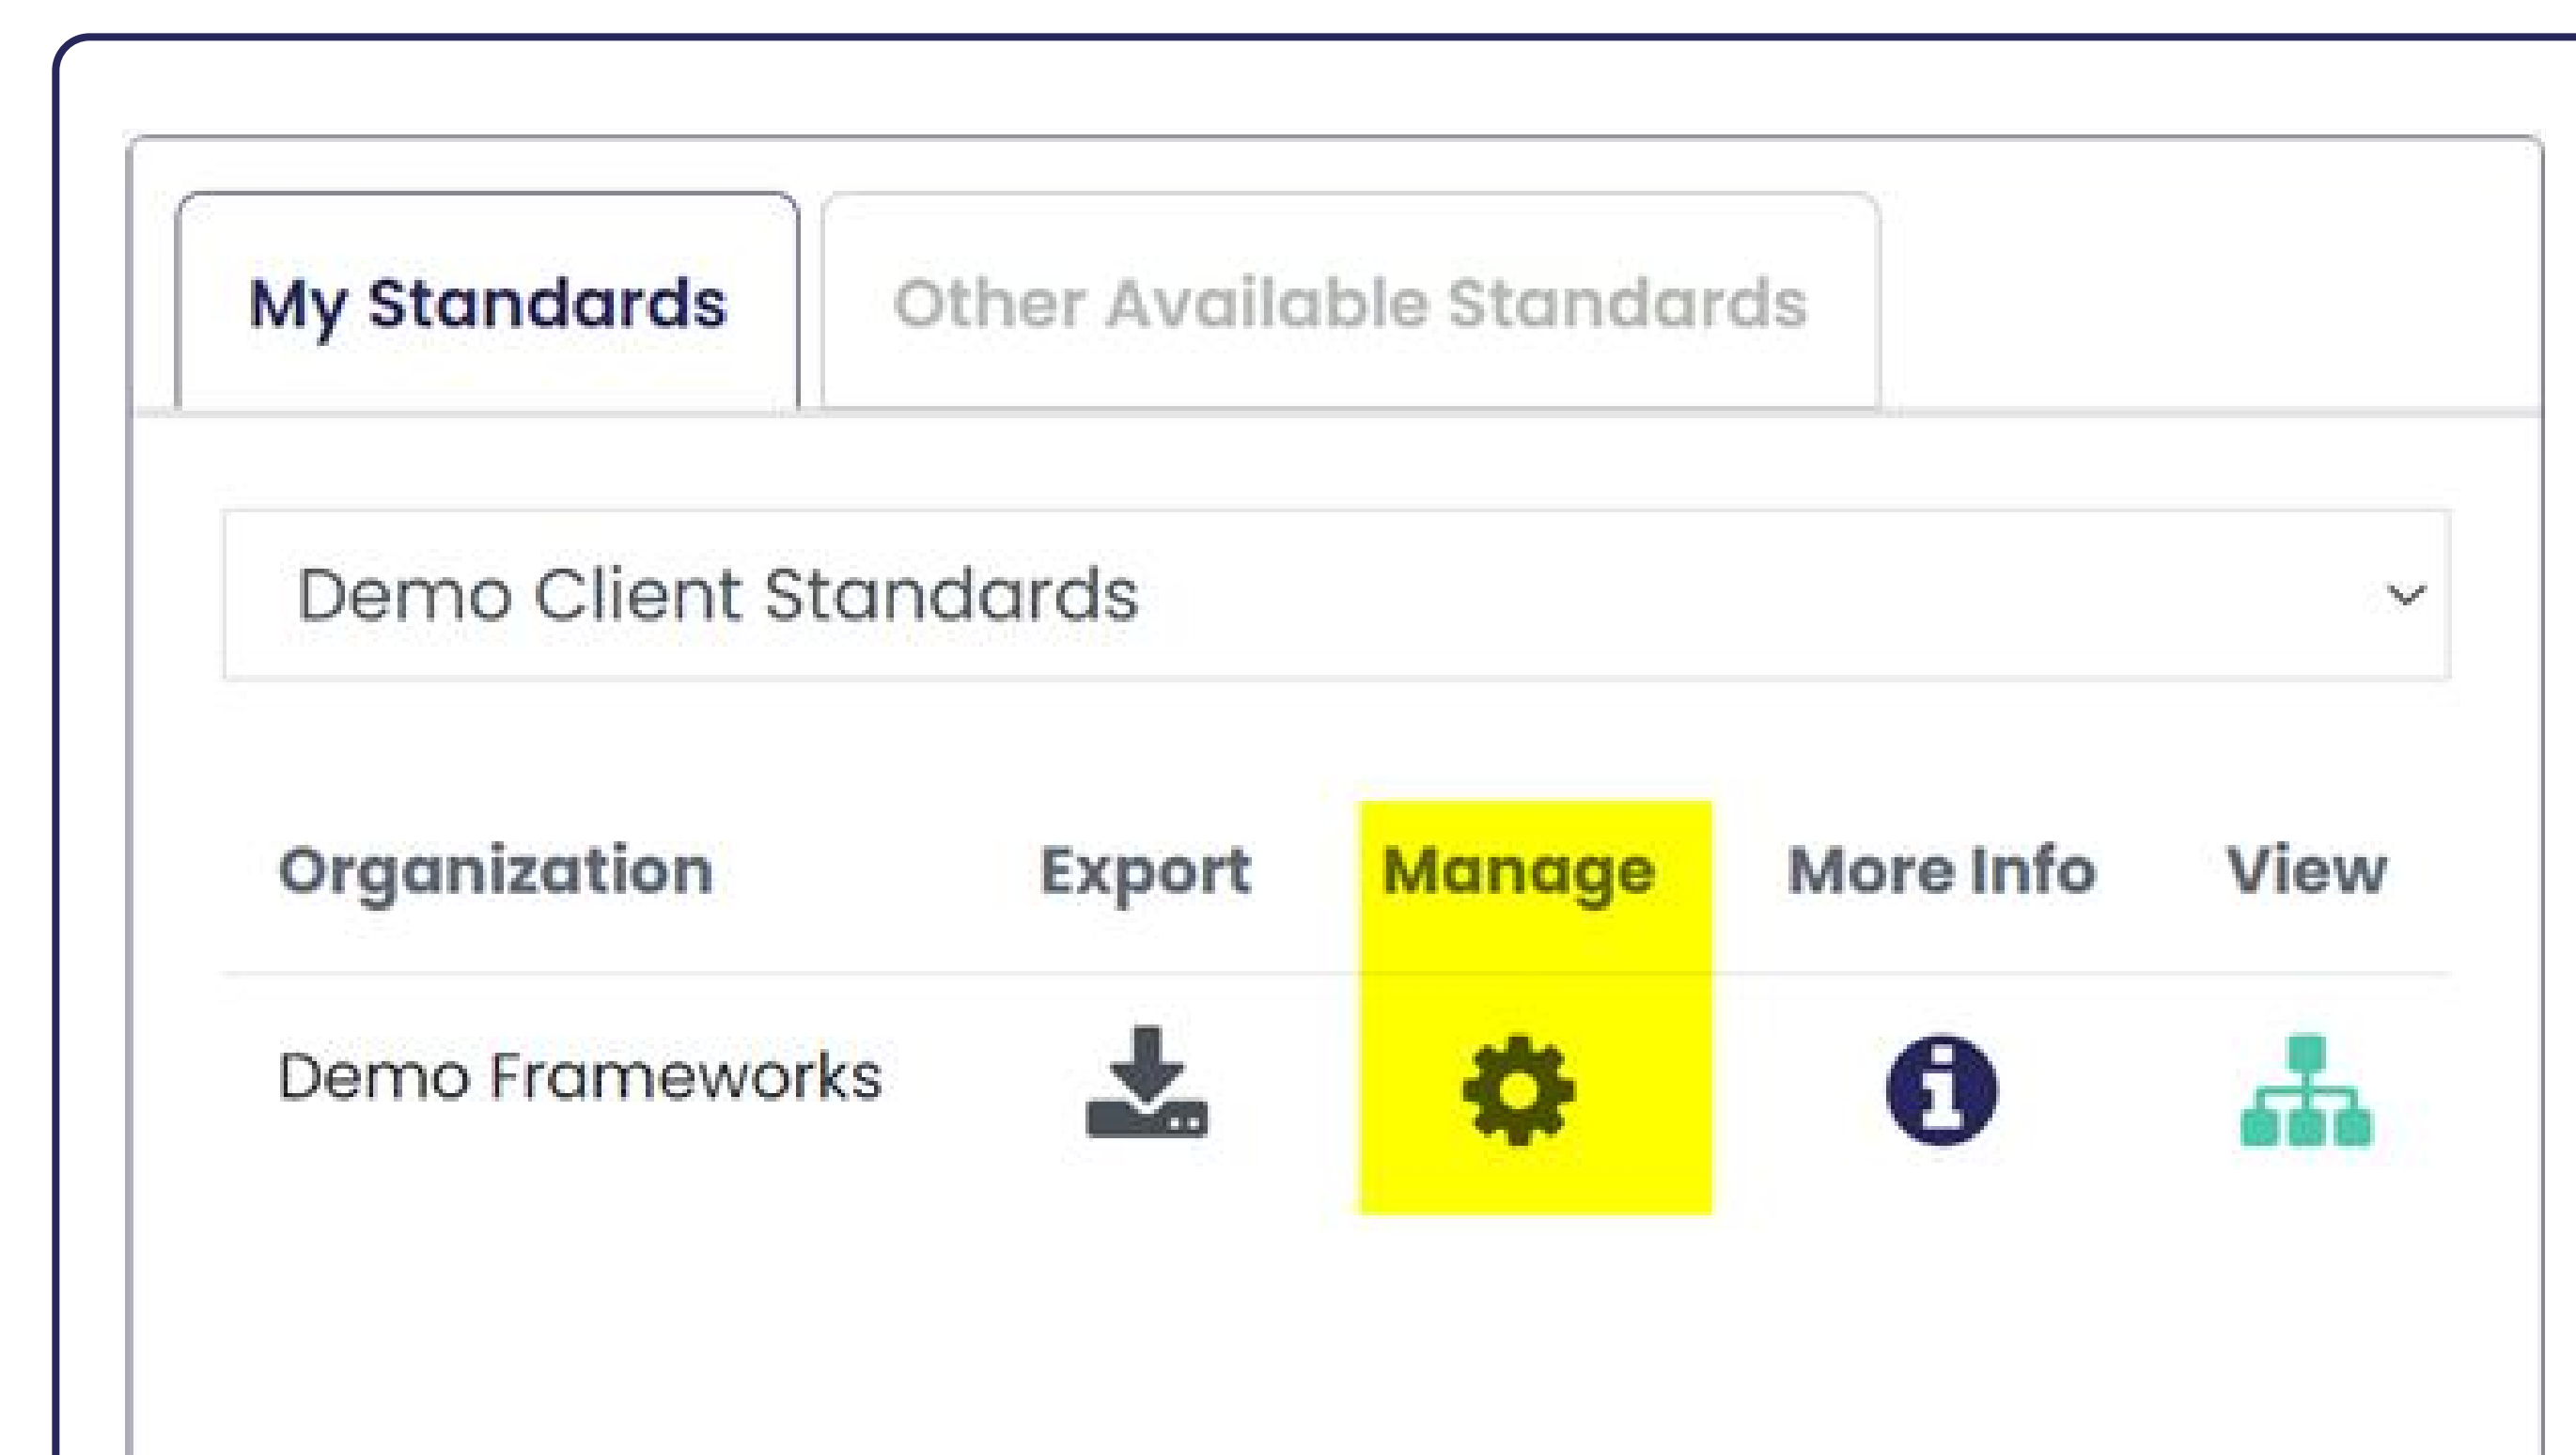

Customized for State Departments of Education, Publisher, and Non-Profit Organization needs, ExACT now also offers the option to create brand new standards and frameworks.

Here's What You Can Accomplish with ExACT Standards Authoring:

- ☑ **Design and Develop Content Standards:** Create and refine content standards across all K-12 subjects.
- ☑ **Import/Export Functionality:** Seamlessly import and export standards.
- ☑ **Alignments:** Utilize the EdGate Concept Index to link relevant terms with the newly created standards. EdGate's alignment methodology allows users to view detailed content alignments and standards comparisons.
- ☑ **Standards Comparison:** Generate reports comparing authored standards with other state and national standard sets.
- ☑ **CASE Formatting:** Ensure standards are in IEdTech CASE-formatted standards.
- ☑ **Hosting:** Secure hosting of standards within EdGate's repository.

Secure Authoring + Storage

With many organizations currently managing their standards in hundreds of Google spreadsheets, the ExACT Standards Authoring tool offers a centralized solution that safely organizes and stores standards as they are being written.

Standards **Authoring**

The EdGate Standards Repository

EdGate provides access to the world's largest repository of enhanced U.S. and international education standards. EdGate's expertise includes providing SAAS solutions in standards framework analytics and design through consulting services delivered by a strong team of subject area experts and within a secure environment for client content management.

Exciting New Standards Authoring Features Coming Soon:

Our team of developers are working to bring additional features to ExACT to enhance the Standards Authoring Application. These new features will provide even greater control and flexibility, making it easier to manage and maintain educational standards. Stay tuned for these powerful updates, designed to elevate your experience.

Coming Soon

- Rights Management:** Assign and manage rights, monitor modifications and approve edits throughout the workflow stages of design, draft and published standards
- Review, Approval, and Authorization Levels:** User tools for reviewing, approving/rejecting and commenting on standards and updates - within your group profile
- Retention of History & Tracking of Edits:** Maintain logs of changes/edits and approvals by user and create a reporting tool that reports activity by user with date selections, within your group profile
- Versioning and Archiving:** Keep track of different versions and archive older standards.
- Public Commenting:** Collect and manage public comments directly within the ExACT Standards Authoring tool, providing community engagement and feedback.

Harness the power of the ExACT Standards Platform to streamline your standards management process. With Standards Authoring, EdGate empowers you to publish, manage, and create new standards effortlessly. Join the many educators and institutions who trust EdGate for their academic standards needs.
